Class Outline:

Description:

This course will help prepare project managers for the PMP Certification exam. It reviews the requirements and procedures for taking the exam and discusses the exam structure. Topic coverage includes general project management concepts such as: project characteristics; differences between programs, subprojects, and portfolios; various organizational structures and the project manager's role in each; and key project management skills. Also included is a review of project management knowledge areas and process groups.

Outline:

Unit 1: Getting started

Topic A: About PMP certification

Topic B: PMP exam content

Unit 2: Project management context

Topic A: Projects

Topic B: Project management concepts

Unit 3: Project management framework
