Class Outline:

Description:

Microsoft® SharePoint® Designer 2013 provides a code-free environment to access data types and build custom SharePoint applications. It allows rapid development of SharePoint workflows to meet a company's specific needs. Before SharePoint Designer, most custom SharePoint applications were created with Microsoft® Visual Basic®. SharePoint Designer simplifies the process with a no-code interface that can be integrated with Microsoft® Visio® 2013 to easily manipulate workflow shapes. In this course, you will create and publish custom SharePoint workflows without code using SharePoint Designer 2013.

Course Outline:

Unit 1: Getting Started with SharePoint Designer 2013

Topic A: Introduction to SharePoint Designer

Topic B: Get Help and Support for SharePoint Designer

Unit 2: Customizing and Implementing Content Types

Topic A: Customize Content Types

Topic B: Implement Custom Content Types

Unit 3: Integrating Data Sources Using SharePoint Designer

Topic A: Access Data Sources

Topic B: Modify a Data Source in Data View

Unit 4: Creating Workflows with the Workflow Platform

Topic A: Implement the Workflow Platform
